PHOENIXALGOS NEW USER ONBOARDING & SELF-HELP MANUAL

System Overview, Account Security, $100k Simulation Defaults & Platform Navigation

Official Self-Help Documentation • Certified Technical Manual

1. Welcome to PhoenixAlgos Auto Trading Web

PhoenixAlgos provides disciplined algorithmic execution, institutional risk controls, and automated capital rotation. New accounts are provisioned with safe simulation defaults so you can test risk-free.

2. Account Access & Credentials Security

Supports Google Single Sign-On (1-click passwordless) and secure Bcrypt-hashed email/password authentication. Newly provisioned accounts receive an unambiguous 8-character password with on-demand random regeneration.

3. Default Simulation: Paper Trading ($100,000)

All new users begin in Paper Trading with $100,000 virtual equity across liquid core tickers (SPY, QQQ, SOXL, NVDA, AAPL, MSFT, etc.).

4. Platform Navigation & Frequently Asked Questions

- Switch tabs using top navigation or hotkeys (Shift+D for Docs, Shift+H for Hedging).
- Auto-Hedging is enabled by default to protect capital.
- Session data is securely stored in dedicated encrypted SQLite storage on Google Cloud Run.
