PHOENIXALGOS TOOLS AND TRADING DESKS USER GUIDE

Complete Operational Manual for the 8 Integrated ATW Trading Desks & Keyboard Shortcuts

Official Self-Help Documentation • Certified Technical Manual

1. Executive Summary & Cockpit Architecture

Auto Trading Web (ATW) organizes institutional trading operations into 8 synchronized trading desks. Designed under strict zero-scrolling and ergonomics mandates, each desk provides focused telemetry and hotkey navigation.

2. The 8 Core Trading Desks

1. Executive Cockpit (Home): Real-time equity curve, gross leverage, buying power, daily P&L, and open positions.

2. TradingView Charts: Interactive multi-timeframe charting with overlaid PhoenixAlgos automated support/resistance triggers.

3. Live Screener Desk: Filter thousands of US equities across liquid optionable universes with real-time sector tags.

4. Capital Rotation (SWAP) Desk: Automated laggard liquidation and breakout rotation pairing.

5. Market Breadth & Heatmap: Visual sector heatmaps with 30-day MoRet% velocity trajectories.

6. 🛡️ Auto-Hedging Desk: Inverse ETF (SQQQ) exposure monitors, margin clamps, and broad-market stress simulation.

7. Customer Support Desk: Live ticket tracker and direct helpdesk dispatch.

8. 📚 Self-Help Docs & Guides: Official technical manuals and certified PDF guides with 'What's New' release timeline.

3. Keyboard Shortcuts & Speed Ergonomics

- Shift + D: Jump directly to Self-Help Docs & Guides.
- Shift + H: Jump to Auto-Hedging Desk.
- Shift + S: Open Capital Rotation SWAP terminal.
- Esc: Close active modals (What's New, confirmation cards, ticket popups).
